Exercise 5 (Due by June 13)

Give the tree sets of two non-local MCTAGs that derive the following sentences. Try to give a linguistically sound analysis, and say why it is sound, and why it is non-local (if that is the case). You do not have to use features! As always, also provide the derivation tree and the derived tree.

1. Extraction out of a complex NP:

   (1) [Which painting]i, did you see a picture of ___i?

2. Extraposition of a relative clause:

   (2) Somebodyi, lives nearby [whoi has a CD burner].
